THE CLEARWATER DIFFERENCE

We are located in the beautiful and green Pacific Northwest just outside of Seattle. Woodinville's wine country is most known for its wineries, some of which are world renown. From wine tasting, hot air balloon rides, biking or walking along the Sammamish River trail, Woodinville provides the perfect backdrop for the relaxing hot tub lifestyle and Clearwater Spas.

All Clearwater Spas are designed with E-Smart technology. This symbol signifies the highest energy efficiencies, the smartest engineering detail standards, global environmentally green components and e-cycling sound programs.

THE CLEARWATER DIFFERENCE

WATER CARE

CLEAR

OPTIONAL FEATURE: CLEAR is a state of the art water management system that is a Clearwater exclusive. It combines four of the best technologies available to provide you the best fresh water experience.

UV & OZONE

STANDARD & OPTIONAL FEATURE: The sun emits invisible light – ultraviolet light. Through leading edge technology, this natural phenomenon is reproduced inside the sanitizers of the Clearwater UVC System Technology lamps. Standard feature for Resort & Beachcraft Series.

OZONE

STANDARD FEATURE: Clearwater Spas ozone helps clean water naturally with less chemicals. Using the latest technologies in ozone water purification, the ozonator uses corona discharge to produce ozone (O₃). Standard feature for all Clearwater Spas but Resort and Beachcraft series.

THE CLEARWATER DIFFERENCE

CLEAR

STATE OF THE ART WATER MANAGEMENT SYSTEM

CLEAR is a state-of-the-art water management system that is a Clearwater exclusive. It combines four proven technologies to provide you the best fresh water experience. Natural and virtually chemical free water that just feels better.

STAGE 1 Copper/Silver Ionization System: Purifies water using safe and natural minerals which inhibit the growth of algae and bacteria and greatly reduces the need for chemical sanitizers.

STAGE 2 Magnetic Field: Water passes by the powerful magnetic field which polarizes molecules and gives water a positive (+) charge. This as a conditioner gives it a silky smooth feel.

STAGE 4 Ozone Generator: Ozone is an EPA-approved antimicrobial oxidizer, sanitizer, and disinfectant helping to rid water of contaminants, thereby improving water clarity and reducing the need for chemicals.

STAGE 3 UVC Sanitizer: Spa water passes over a focused wavelength ultraviolet (UV) lamp sterilizing the water from microorganisms including algae, bacteria, viruses, and mold.

WHY IS IT BETTER?

CLEAR allows you to soak in odorless, clear natural water. To make CLEAR work at its optimum level, we have also included a 35 gallon per minute circulation pump.

To put it in perspective, a Clearwater Spa working with our cleaning system and circulation pump, will put every drop of water through the filtration system 5 times an hour.

Most manufacturers use the jet pumps to do two jobs; filter the water on low speed and move water to the jets on high speed. We at Clearwater Spas believe it's more important to dedicate a pump to 24/7 water filtration. Every Clearwater Spa includes a 24/7 circulation pump.

ENERGY EFFICIENCY

All Clearwater Spas are designed with E-Smart technology. This symbol signifies the highest energy efficiencies, the smartest engineering detail standards, global environmentally green components and e-cycling sound programs. All of Clearwater Spas are certified to California's Energy Commission (CEC) – the most stringent energy standards in the United States. We not only meet these standards – we exceed them.

Clearwater Spas takes pride in using recycled ABS to fabricate our Durafloor on all of our spas. We also recycle our wood, plastic and cardboard waste. See for yourself what this commitment to excellence looks like. Contact your Clearwater Spas dealer and get started on finding your own personal relaxation destination.

Clearwater Spas was the first company to produce an ecologically sound product, and all of our spas are produced without fiberglass resin and other destructive agents. Our EcoSpray was developed specifically to provide a solution to the styrene problem in the spa and bath industry and does not emit any volatile organic compounds (V.O.C.'s) into the air.

SWIM SPA 1200

A Clearwater Swim Spa is a great way to entertain the entire family. With room for the kids and adults enjoying a great time together, to a rigorous lap training session, all in the privacy of your backyard, this year-round experience is a great investment for everyone.

The touch screen control offers a wide variety of workout modes to ensure that you achieve your fitness goals including timed or interval training programs. Or, you can even set your own custom programs to match your pace. There's lots of great water features, lights and an optional stereo to turn up the fun for the whole family.

Here are just some of the benefits that you can experience with your Clearwater Swim Spa:

- **Swim Training**
- **Low Impact Exercise**
- **Low Gravity Exercise**
- **Recreational Family Fun**

EXCLUSIVE FEATURES

A Better Build

Circulation Pump

The energy efficient circulation pump works to automatically filter 100% of the water through each of the filtration systems several times a day.

Multilayered shell system with environmentally friendly EcoSpray is the strongest in the industry

- 1 100% EcoSpray
- 2 Steel support in heavy traffic areas for ultimate strength
- 3 ABS backed acrylic for impact resistance
- 4 Acrylic shell for beauty and strength

PVC column support foundation

- Supports over 10,000 pounds (5 tons)
- Will not rot, mold or rust
- Spa industry's strongest column supports
- Engineered for a precise fit to every spa

Synthetic DuraTech Frame

Traditional wood frames are subject to deterioration due to exposure to water, heat, and stress. All Clearwater Spas use our unique pillar system to carry the weight of the spas, taking the stress off the frame. Now our Duratech cabinets can be upgraded to a synthetic material ensuring the spa maintains its pristine look and integrity adding many years to the life of the spa.

Reflective Thermal Barrier (RTB) Insulation

Double-sided foil rigid insulation panels. 12% more energy efficient than spray foam spas. This allows the thermal gain from the pumps and heater to be reflected back into the spa cabinet, heating the shell and water and saving you hundreds of dollars over the lifetime of your spa

Durafloor

Our custom molded, fully insulated Durafloor is silicone sealed and screw bonded to our cabinet. This foundation lifts the spa off the ground, protecting the structure from moisture, bugs and other negative influences. Includes a 20 year warranty.

ACCESSORIES

Cover lifts (Optional Accessory)

Clearwater Spas cover lift makes it easier to remove your hot tub cover. The high quality, powder coated aluminum tubing is corrosion-free. Foam grips make handling comfortable. Comes with a standard accessory for hanging towels. Made in the U.S.A.

Steps (Optional Accessory)

Weather-resistant polypropylene steps provide easy access into your hot tub. These two-tier steps come in black, gray or brown (with black riser).

Cover

Clearwater Spas fully-insulated hardcovers are tapered from 3in on the ends up to 5in in the middle to assist with rain and snow drainage. Insulation rating R-18 value. Quality made with virgin foam cores, marine grade vinyl, full-length heat seal gaskets. UL Classification for ASTM Safety. Child safety locks standard. Made in the U.S.A.

(*Colors: Gray, Brown, and Black).

Bluetooth Music (Optional Upgrade)

The ClearPlay™ wireless sound system lets you stream and listen to your mobile digital music files using Bluetooth technology. Simply pair your mobile device to the ClearPlay™ sound system and enjoy all of your audio music files from a range of up to 30 feet or 10 meters. The topside controller also lets you turn your power on/off, volume up/down, skip forward/backward right from the comfort of the spa.

CLEARWATER SPA CONTROL

TOUCHSCREEN

The control panel is easy to operate, and made to be used with wet fingers.

THERAPY

Turn the pumps and jets on and off.

TEMPERATURE

Adjust and set the spa temperature.

LIGHTING

Change the color of your spa lights.

AUDIO

Connect your phone/tablet through Bluetooth and use any music streaming service of your choice.

SETTINGS

You are able to adjust:

- Filtration
- Maintenance
- Date & Time

DuraTech Cabinets: Ultra-low Maintenance

Just an occasional wash with soapy water will keep your DuraTech cabinet free of dust & grime and looking its very best.

Ultimate Outdoor Performance

DuraTech naturally resists splintering, rot, warping, and damage from insects and other pests.

Resort and Beachcraft Series come in all colors standard. All other series come with Sterling Silver or Tuscan Sun as standard colors. All other colors are custom options.

Swim Spa comes only in Sterling Silver. Contempo and Swim Spa cabinets come in Mystic Gray only.

HYDROTHERAPY MASSAGE

FOR A HEALTHY BODY

According to medical research, a hot tub can help those suffering from arthritis, low back pain and high blood pressure. Use of a hot tub has also proven to aid in weight loss and helps you sleep more soundly.

FUN & ENTERTAINMENT

Enjoy time with family and friends. Nothing says entertainment like a Clearwater Spa. Featuring up to 70 lighted jets, a removable table accessory, and a bluetooth sound system for easy entertaining, day or night.

REFLECTION & ESCAPE

A hot tub can be an excellent stress reliever. For those moments when you want to get away, escape into a Clearwater Spa. Allow your troubles to melt away while enjoying a hydrotherapy massage in complete privacy.

Relieves: muscles, cramps and joint pain.

I Foot, Ankle & Heel

Relieves: muscles, plantar fasciitis, arthritis and joint pain.

Relax Better. Sleep Better. Feel Better. Live Better.

CLEARWATER JETS

1

The Patented locking system ensures positive engagement between the insert and the body.

2

The o-ring seal improves vacuum and air draw by up to 46%.

3

The o-ring on the diffuser enhances the smooth rotational feel of the jet.

All of our jets are optimized for the particular position on the body and muscle groups they target.

We use 3 different sizes of hydro-massage therapy jets with a number of different nozzle configurations. This provides for a varied massage experience from light and fast pulsating to a slower, deeper kneading effect.

All the jets are individually adjustable for flow, and some can be tailored for speed and treatment area too.

CONTROLS AND ERGONOMICS

CLEARWATER SPAS ARE DESIGNED BY OUR IN-HOUSE ENGINEERS, KNOWN NOT ONLY FOR THEIR TECHNICAL EXPERTISE BUT ALSO FOR THEIR CAPSCIENTIOUS DESIGN ABILITIES.

1. LOUNGE SEAT

Our lounge seat is ergonomically designed to fit your needs in the most comfortable way. It targets areas such as your shoulders, back, legs and feet.

2. THERAPEUTIC SEAT

Our therapeutic seats are designed to offer a different kind of hydrotherapy. They use a variety of jet placements in order to make a quantifiable difference.

3. COOL DOWN SEAT

The cool down seat allows you take a break from the heat of the water but still enjoy your spa and the company of your family and friends.

COLOR THERAPY

Enhance your spa experience with multi-colored lighting. Change colors to suit your mood. Set to transition through all seven colors or set to one favorite.

Choose your color according to your mood:
